Knowledge of addition, subtraction, multiplication, and division will be necessary. Specific knowledge of weights and scales is not required.

4. WEIGHTS AND MEASURES:

These questions test your ability to select the proper course of action in situations which might occur during routine inspections. Question topics may cover, but will not be limited to, such areas as interviewing, gathering information and evidence, maintaining proper attitude, and handling irregularities and violations with integrity and sound judgment. Some questions may be in a situational format while others may deal with the proper principles and practices of inspection.

6. SUPERVISION:

These questions test for knowledge of the principles and practices employed in planning, organizing, and controlling the activities of a work unit toward predetermined objectives. The concepts covered, usually in a situational question format, include such topics as assigning and reviewing work; evaluating performance; maintaining work standards; motivating and developing subordinates; implementing procedural change; increasing efficiency; and dealing with problems of absenteeism, morale, and discipline.
